

SERUYANGE JOSEPH

Software Engineer | Go · Flutter · React · Spring Boot · PostgreSQL

seruyangejoseph9@gmail.com · +256 785 246 011 · Kampala, Uganda (open to remote, worldwide) · linkedin.com/in/seruyange-joseph · github.com/seruyange-jojo

PROFESSIONAL SUMMARY

Software engineer with three years of production experience, most recently CTO & Head of Software Engineering at Zaantu Technologies while completing a BSc in Information Systems. Built an offline-first warehouse inventory platform from the ground up, then moved into technical leadership — setting engineering strategy, KPIs, and process for a small team. Full-stack across Go, Spring Boot, Flutter, React, and PostgreSQL, with experience delivering for international clients (Japan-based Macho Bar App project, a cross-border job-portal partnership). Seeking remote software engineering roles.

TECHNICAL SKILLS

Languages: Go, Dart, Java, JavaScript/TypeScript, Python, SQL, PHP

Backend & Data: Spring Boot, Gin, GORM, JPA/Hibernate, REST APIs, PostgreSQL, MySQL, SQLite, H2

Frontend & Mobile: React, Flutter, Tailwind CSS, Responsive Design

DevOps: Docker, Docker Compose, Linux, Nginx, Git/GitHub, GitHub Actions (CI/CD); working knowledge of AWS

Practices: Agile, TDD, Code Review, Requirements Engineering, Offline-first Architecture, Technical Leadership

PROFESSIONAL EXPERIENCE

CTO & Head of Software Engineering · Zaantu Technologies · Nov 2025 – May 2026

- Led technical direction for a small team building an offline-first warehouse inventory system for factory owners in Uganda; wrote and shipped code week to week (Go, Flutter, React)
- Set department KPIs, SOPs, and a Coda.io project tracker across a portfolio spanning inventory, HR, e-waste, and job-portal products
- Ran a technology/process audit for a partner company, producing 90-day and 12-month action plans; conducted code reviews and mentored junior engineers

Full-Stack Developer & Software Development Intern · Zaantu Technologies · Aug 2024 – Nov 2025

- Built the core inventory system from an early stage — database schema, Go backend APIs, React frontend, and an offline-first Flutter mobile app
- Contributed to a job portal delivered in partnership with DaraJapan (Japan), gaining early cross-border client experience; worked in a team of 3–5 engineers

QA Engineer (Contract) · Zaantu Technologies — Macho Bar App project (Japan-based client) · Jun 2025 – Nov 2025

- Wrote and executed QA test plans, tracked bugs with reproduction steps, and worked directly with an international client to validate requirements

KEY PROJECTS

Zaantu Inventory Management System — Go · React · Flutter · PostgreSQL · SQLite · Docker

- Offline-first warehouse inventory platform for Ugandan factory owners; owned the full stack from schema to mobile app

Chukuz Rides — B2B Last-Mile Delivery Platform — Product & Technical Design

- Technical Lead defining product and architecture for a B2B delivery platform letting Kampala shops outsource deliveries to on-demand riders

HR Management System (HRMS) — React · Go · Gin · GORM · PostgreSQL · Docker

- Independent full-stack HR system with role-based access, leave workflows, JWT auth, and analytics dashboards; containerised with Docker Compose

URL Shortener Service — Java · Spring Boot · JPA/Hibernate · PostgreSQL/H2

- RESTful URL-shortening service with JPA-backed persistence, unique short-code generation, and relational schema constraints

EDUCATION

Bachelor's Degree in Information Systems, Expected 2026 — Kyambogo University, Kampala, Uganda · CGPA: 4.45/5.0

CERTIFICATIONS & LANGUAGES

Frontend Masters (2024–2025): Go, Flutter, Backend Architectures, Containers, Linux/Command-Line, Git · freeCodeCamp Responsive Web Design · U. Michigan Python Basics · Ongoing DSA interview prep (LeetCode, NeetCode)

English — Fluent (Professional Working Proficiency)
